

# CMMC Level 2 Compliance

TESTED, NOT JUST DOCUMENTED.

## THE CHALLENGE

CMMC Phase 2 enforcement begins November 2026. Contractors without certification lose access to DoD contracts requiring CUI handling. A failed C3PAO assessment costs \$50,000–\$100,000 in fees, remediation, and delays.

## 01 GAP ASSESSMENT

Full evaluation against 110 NIST 800-171 controls. CUI boundary scoping. Prioritized gap report with remediation roadmap.

## 03 REMEDIATION SUPPORT

SSP and POA&M development. Policy and procedure documentation. Evidence package preparation. Implementation guidance.

## WHY DEEP WOODS

Every CMMC consultant documents your controls. We test them. OSCP-certified penetration testing scoped to your CUI boundary. If we can't get through, neither can the assessor.

## 02 PENETRATION TEST

Adversarial testing scoped to your CUI boundary. Manual exploitation, not just scanning. Every finding mapped to the NIST 800-171 control it violates.

## 04 PRE-AUDIT VALIDATION

Mock C3PAO assessment. Every control verified through examine, interview, and test before the real assessors arrive.

TS/SCI ACTIVE | OSCP CERTIFIED | NIST 800-171 | SAM.gov REGISTERED

Free 30-minute CMMC briefing. No sales pitch.
